SPECIFICATION ASSESSMENT SOFTWARE

CIRT

Composite Inspection Reporting Tool

CONVERGENT
MANUFACTURING TECHNOLOGIES
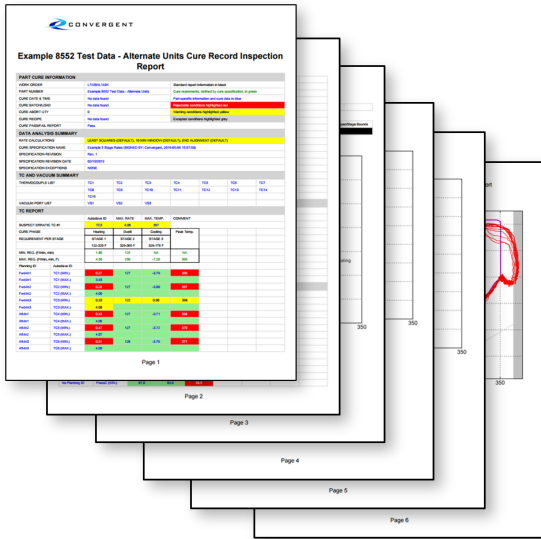

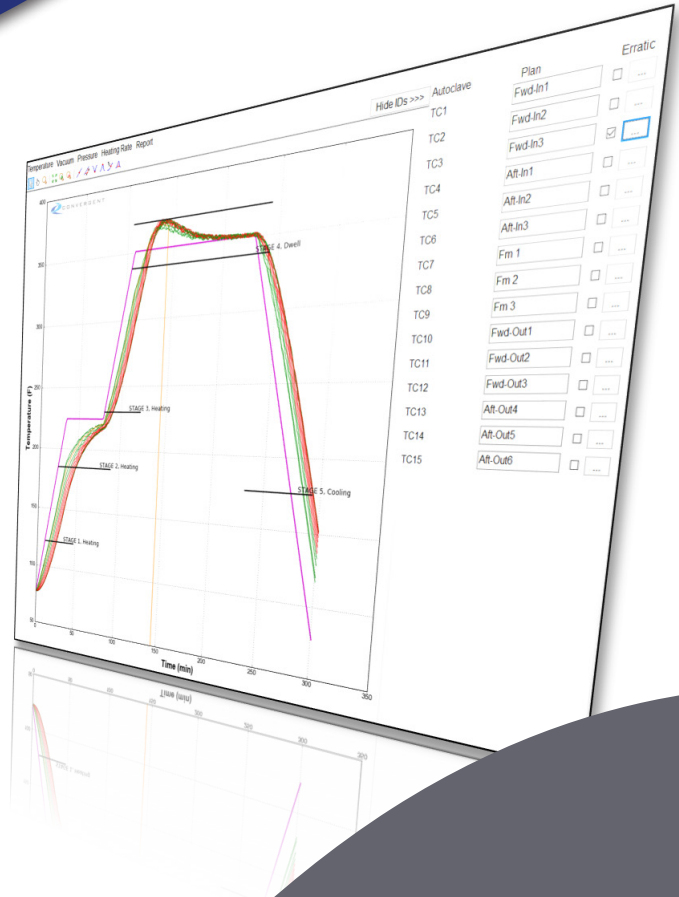

Inspect process data from manufacturing processes such as:

- Autoclave
- Out-of-Autoclave
- Repair
- Press Processing

- ✓ Directly imports processing data
- ✓ Evaluates specification compliance
- ✓ Detects and flags erratic signals
- ✓ Automated reporting

CIRT

streamlines inspection for cure cycle specification compliance, simplifies detection of erratic signals, generates reports automatically and is compatible with Convergent's suite of composite process modelling software solutions.

CIRT Features

CIRT streamlines inspection for cure cycle specification compliance, simplifies detection of erratic signals, generates reports automatically and is compatible with Convergent's suite of composite process modelling software solutions.

CIRT capabilities:

- Load, sort and flag process data
- Evaluate process compliance with specifications
- Apply and note exceptions
- Interrogate data with analysis tools: pan, zoom, probe, etc.
- Maintain documentation control with fingerprint-based change detection and administrative role management
- View and report compliance for complete loads and individual parts
- Create custom process specifications
- Create custom outcome reports

Flag Erratic Signals
